CLEANER FIELDS, HIGHER YIELDS\*

- Proven High Performance. In four years of Monsanto field trials in 6 states, comparing near-isogenic lines, Genuity™ Roundup Ready 2 Yield® soybeans delivered 7 to 11 percent higher yields than Roundup Ready soybeans.
- Observations show higher yield is the direct result of more 3-bean pods per plant and more seeds per plant with Genuity™ Roundup Ready 2 Yield® vs. first-generation technology.
- All Genuity™ Roundup Ready 2 Yield® soybean varieties will be offered with Acceleron™ seed treatment in 2009. For 2009, Acceleron™ will consist of the fungicides pyraclostrobin + metalaxyl and a colorant.

Genuity™ Roundup Ready 2 Yield™ Soybeans are covered under one or more of the following patents: U.S. Patent No(s): 5,717,084; 5,728,925; 5,804,425; 6,660,911; 6,949,696; 7,141,722 and RE 39,247.

Always Read and Follow Pesticide Label Directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® agricultural herbicides. Roundup agricultural herbicides will kill crops that are not glyphosate tolerant.
