A grain mixture for poultry

FEEDING DIRECTIONS

Feed as a source of grain for poultry. Grain furnishes the energy part of the ration for the flock. Additional protein, vitamins, and minerals must be added to provide a nutritional, healthy diet.

For laying chickens

Mix 1 part scratch and 1 part Hi-Pro 20% Layer Ration.

For young chickens, ducks, turkeys

Mix 1/3 scratch and 2/3 Hi-Pro 20% Layer Ration to provide a 16% crude protein diet.

Mix 1/4 scratch and 3/4 Hi-Pro 20% Layer Ration to provide a 17% crude protein diet.

For laying hens not producing eggs

When hens are not producing eggs, scratch grains or home grown grain can be used in combination with Hi-Pro 15% Layer Ration for maintenance.

Very young poultry should be fed a nutritionally balanced complete feed because scratch grains cannot be utilized efficiently.

Fresh clean water is the most important nutrient. Provide abundant amounts at all times.

GUARANTEED ANALYSIS

Crude Protein.....	9.0%	Crude Fiber.....	2.5%
Crude Fat.....	2.0%		

Features & Benefits

- Feature:** Designed For The Home Flock
Benefit: High Quality ingredients include cracked corn, whole milo, and whole wheat.
- Feature:** Yellow corn is cleaned then cracked to just the right size for chicken feeding. Whole milo and whole wheat are then blended in for variety.

HELPFUL HINTS

Sanitation is the best known prevention of disease and parasites. Clean the house thoroughly between groups of poultry, maintain dry litter, and provide sufficient floor space.
